Algorithm 3: pure state, $D = 4$ (two qubits)
(a) Squared Bures: mean design
Mean information criterion $\widehat{C}_n$
3.100
3.075
3.050
3.025
3.000
$\widehat{C}_n^{\mathrm{cur}}$: current design
$\widehat{C}_n^{\mathrm{avg}}$: accumulated information
Gill-Massar bound
256
4,096
8,192
12,288
16,384
Copies, n
(b) Squared Bures: loss
$\widehat{R}_B(n)$
6
5
4
3
Corrected (Algorithm 3)
Uncorrected preliminary
Gill-Massar bound
